DETAILED ACTION

Rejections and/or objections as previously applied

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 1, 3, and 24 as currently amended are rejected under 35 U.S.C. 102(e) as being anticipated by Doan et al. (US publication 2002/0175322).

With respect to claim 1, Doan et al. teach a structure in a phase changeable or chalcogenide memory cell, comprising (see figs. 1-32 and associated text):

A bottom electrode 102 having an interlayer dielectric layer 116 thereon, the bottom electrode having a recess therein that extends beyond a boundary between the bottom electrode and the interlayer dielectric; and

A phase changeable or chalcogenide layer 120 in the recess including a protruding portion of the of the phase changeable layer that protrudes into the bottom electrode beyond the boundary, wherein the phase changeable layer contacts the bottom electrode within the confine of the recess.

With respect to claim 3, Doan et al. further teach the interlayer dielectric layer includes a contact hole with the phase changeable layer therein on the recess. See figs. 1-32 and associated text.

With respect to claim 24, Doan et al. teach a structure in a phase changeable memory cell, comprising (see figs. 1-32 and associated text):

A bottom electrode 102 having an interlayer dielectric layer 116 thereon; and

A phase changeable layer 120 extending through the interlayer and protruding into a recess in the bottom electrode wherein the phase changeable layer contacts the bottom electrode with confines of the recess.

Further with respect to claim 24, Doan et al further teach the bottom electrode defines a sidewall (boundary between the layer 102 and 120) of the recess that contacts the protruding portion of the phase changeable layer 120. See fig. 20 and associated text.

Response to Arguments

Applicant's arguments filed 07/03/06 have been fully considered but they are not persuasive. See below.

In response to the arguments in the bottom paragraph on page 7 and the first paragraph on page 8 of the amendment dated 07/03/06, it is submitted that fig. 20 of Doan shows bottom electrode 102 having a recess (a space in 164 where phase chargeable layer is located) or a recess is in the bottom electrode. Further, it is submitted that rejected claims do not require the recess is formed within the bottom electrode.

Allowable Subject Matter

Claims 4, 5, 6, 7, 8, 9, and 10 are allowed.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
